Emmanuel Toluwalope Adesipe

Fullstack Developer

+2349063339938 ◇ emmanueladesipeog@gmail.com ◇ Github ◇ LinkedIn ◇ Portfolio ◇ Upwork

SKILLS

Languages: Python, JavaScript, TypeScript, Move (Smart Contract Development)

Backend Development: Django, Flask, ExpressJs, NestJs

Frontend Development: SvelteKit, NextJs, React, TailwindCSS

Tools: Postman, MongoDB, SupaBase, Git, Sentry

My Core Competencies: Rapid prototyping, Database Schema Design, Fullstack integration, Authentication System.

EXPERIENCE

ECX | Volunteer Backend Developer

(part-time) Nov 2025 - Jan 2026

Contributed to the design and implementation of backend services for ECX products, focusing on building scalable APIs, integrating cloud-based databases, and ensuring reliable authentication and data management across the platform.

- Developed secure authentication flows and implemented JWT-based access control.
- Built and maintained backend endpoints using Node/ExpressJS with Supabase.
- Collaborated with cross-functional teams to improve system reliability, debug issues, and optimize API performance.

Stack: ExpressJs, Django, Sentry

ScholarArk | Lead Backend Developer

(full-time) Oct 2025 - Feb 2026

Main developer of the core backend architecture powering ScholarArk's assessment and learning platform. Designed and implemented scalable RESTful APIs, authentication flows, and AI assessment-generation features while ensuring performance, security, and clean code practices across the codebase. Collaborated closely with the product and frontend teams to deliver stable, production-ready features used by tutors and students.

- Built and optimized major backend features including authentication, assessments, AI-powered question generation, and student assessment flows.
- Integrated role-based access control, guards, and rate-limiting to secure platform endpoints.

Stack: NestJS, Swagger

PROJECTS

VitalAid | Startup | Website

An emergency healthcare platform featuring an AI-powered emergency services and a USSD interface for low-connectivity environments.

- Integrated USSD support via Africa's Talking Sandbox Simulator.
- Designed REST APIs for chatbot and emergency features

Stack: ExpressJS

Role: Backend Developer

Swix | Side-project | Website | Source code

Built a Twitter like social media platform as part of my internship tasks at Code Alpha

- Developed core social features including user profiles, follow/unfollow functionality, post creation, and like/unlike

interactions.

- Implemented JWT-based authentication and secure user account management.
- Built REST APIs in Django Rest Framework and integrated them with SvelteKit frontend for seamless user experience.

Stack: SvelteKit, Django, Django Rest-Framework

Role: Fullstack Developer

7-GUI challenges | Website | Source code

Completed the 7 GUI frontend challenge benchmark using sveltekit.

Stack: SvelteKit

Role: Frontend Developer

EDUCATION

Bachelor of Sciences in Mechanical Engineering, University of Lagos, Akoka
Oct'23 –Present

- Member, GDGoC (Google Developer Groups on Campus)
- Member, Sui On Campus (Web 3 community)

Senior Secondary Certificate in Science-Tech, King's College, Lagos
Oct'16 – Aug' 22

GPA: 3.02 / 4.00; SAT: 1520/1600; UTME: 340/400; WAEC-GCE: 4As, 4Bs

- Asst Utility Prefect
- Honors: Best in Data Processing, Best Visually Impaired Aidee
- Involvements: JETS Club, ICT Club, Lego Club

CERTIFICATIONS

Certifications, Google Drive

AWARDS

People's Choice Award, NASA Space App Competition Oct' 24

2nd Runner up, Cavista Technologies Hackathon 2025: Team Trendsetters Feb' 25

- Project: Vital-Aid

1st Place, Covenworks AI for social Impact Hackathon Jan' 25

- Project: Vital-Aid
